

Ukraine : Oleksandr

Lawyer/Human Rights Defender

Oleksandr is in his forties and works as both a lawyer and human rights defender. He is currently working on **legal cases of human rights violations**, which involves preparing documents for international courts.

He uses **2-factor authentication** with Gmail, Google Drive, and Facebook. However, he is always **forgetting his passwords**. He writes the passwords down on a sheet of paper, but still sometimes struggles with logging in to his Gmail account.

Though he is a lawyer, he is not aware of how police are inspecting devices.

"I forgot my password.
Again."

Goals

He needs to be able to **store sensitive data** safely.

He also needs to be able to **transfer the data** securely.

He wants to make sure human rights defenders are not **imprisoned**.

#privacy #securecomms

Threats

Partly Free
(Freedom on the Net 2017)

His laptop, smart phone, or flash drives could be **confiscated**.

At the border, authorities could gain access to his devices.

He could be the target of **malware** or **phishing attacks**.

#seizure**

Internews
Local voices. Global change.

Strengths

Oleksandr has **encrypted** his laptop using BitLocker.

Both his laptop and smart phone are **password protected**.

He knows the laws and can access **remote IT support** when needed.

Questions

What happens if I **lose my password** again?

What happens to all of my data if my laptop or smart phone is **confiscated**?

What happens if my laptop or smart phone is **infected with malware**?
